Office Accommodation and ICT in Government

The Public Service Commission (PSC) has embarked on two flagship projects to assess the effectiveness of Government support for service delivery focused on accommodation and property management services, and Information and Communication Technology (ICT).

As part of these projects, the PSC held its **"1st Peer Working Group Session on Accommodation and ICT in Government"** on 31 October 2022. The purpose of the session was to obtain the buy-in and commitment from the various stakeholders and role players on the outcomes of these flagship projects. The outcome of the session will form part of the foundation of the upcoming Roundtables on 16 and 30 November 2022 for Accommodation and ICT respectively.

The session was attended by, amongst others, Commissioners Leonardo Goosen, Yasmin Bacus, Mandla Makhanya, PSC Senior Managers and senior representatives from different government departments and institutions responsible for accommodation and ICT in the Public Service.
